Mechanical Engineering - Vehicle Engineering

Institution: An-Najah National University. Specialization: Mechanical Engineering, Vehicle Engineering minor.

Plan identifier shown in the uploaded screenshot: 10624-2026/1. Report period: first semester 2026-2027.

Total required: 137 credits = 12 university required + 116 major required + 9 major electives. The free-course panel separately shows 2 required and 2 remaining credits. Including that category makes 139, which conflicts with the printed 137. Keep the discrepancy unresolved; do not change the official total.

This extract includes all 60 distinct visible rows: 7 university rows (12 credits), including one zero-credit remedial course, and 53 major-required rows (116 credits).

Course 10620422 is visible at the bottom of screenshot 1 and the top of screenshot 2; it is recorded once.

The screenshots show a 9-credit major-elective category, but no elective course names. The free-course panel has no visible course names either.

Prerequisites, semester placement and degree duration are not shown. They remain unknown. Replacing the pending four-year Computer Engineering slot does not prove that this program lasts four years.

The personal student name, student number and individual course-progress indicators are omitted. This is curriculum data, not a student record.

English course names below are explanatory translations; the transcribed Arabic titles are in the companion JSON and Markdown.

Factual transcription checked against the original two user images on 2026-11-07. The first image overlaps the second at course 10620422.

Plan 10624-2026/1: university required

Course names are English translations. Arabic source titles are in the JSON.

Code / credits	Course name (translation)	Original image
10032103 | 0 credits	Remedial general English	1
11000109 | 1 credits	Community service and sustainable development	1
11000114 | 2 credits	Palestinian studies	1
11000122 | 2 credits	Arabic language	1
11000123 | 2 credits	Islamic culture	1
11000124 | 3 credits	Engineering English	1
11000129 | 2 credits	Introduction to artificial intelligence and data science	1

Plan 10624-2026/1: major required

Course names are English translations. Arabic source titles are in the JSON.

Code / credits	Course name (translation)	Original image
10211101 | 3 credits	Calculus 1	1
10211102 | 3 credits	Calculus 2	1
10211201 | 3 credits	Calculus 3	1
10211202 | 3 credits	Engineering mathematics	1
10221101 | 3 credits	General physics 1	1
10221102 | 3 credits	General physics 2	1
10221115 | 1 credits	General physics laboratory for engineering	1
10231101 | 3 credits	General chemistry 1	1
10604200 | 3 credits	Statics	1
10606102 | 2 credits	Engineering drawing	1
10620110 | 1 credits	Engineering workshops theory 1	1
10620111 | 0 credits	Engineering workshops practice 1	1
10620120 | 1 credits	Engineering workshops theory 2	1
10620121 | 0 credits	Engineering workshops practice 2	1

Plan 10624-2026/1: major required

Course names are English translations. Arabic source titles are in the JSON.

Code / credits	Course name (translation)	Original image
10620122 | 1 credits	Mechanical drawing	1
10620210 | 3 credits	Thermodynamics 1	1
10620212 | 3 credits	Engineering materials	1
10620222 | 3 credits	Fundamentals of mechanical design	1
10620313 | 3 credits	Machine design 1	1
10620320 | 3 credits	Mechanical vibrations	1
10620321 | 1 credits	Fluid mechanics and thermal sciences laboratory	1
10620323 | 3 credits	Theory of machines	1
10620422 | 2 credits	Applied mathematics for engineers	1
10624100 | 1 credits	Ethics and occupational safety in vehicle engineering	2
10624210 | 3 credits	Vehicle dynamics	2
10624260 | 3 credits	Power electronics for electric vehicles	2
10624264 | 3 credits	Fundamentals of vehicle electricity and control	2
10624318 | 2 credits	Fluid dynamics	2
